BACKEND DEVELOPMENT

- Python
- Django
- Django REST Framework (DRF)
- RESTful APIs
- API Integration & Design

DATABASE & INFRA

- PostgreSQL
- Docker
- Git, GitHub

TESTING & SECURITY

- Unit Testing (pytest)
- OWASP Standards
- VAPT
- XSS / SQL Injection Mitigation

METHODOLOGIES

- Agile
- Scrum
- Software Development Lifecycle (SDLC)

DOMAIN EXPERTISE

- Conversational AI / Chatbot Development

EDUCATION

B.Tech, Computer Science
JECRC University, Jaipur
2018 – 2022

CERTIFICATIONS

MTA Security Fundamentals
INE Cloud Fundamentals
INE eJPT

ACHIEVEMENTS

Winner, National Entrepreneurship Challenge, IIT Bombay
1st Rank, Envision, St. Xavier's College

Backend Software Engineer with **2+ years** of hands-on experience designing and deploying secure, scalable **REST APIs** and **Conversational AI systems** using Python, Django, and Django REST Framework. Delivered **50+ production deployments** across Web, Android, and WhatsApp for financial institutions and enterprise clients, applying **OWASP-aligned** security practices and **Docker**-based containerization throughout the development lifecycle.

EXPERIENCE

CognoAI

Python Django Developer · Jaipur, India

- Built and deployed **50+ Conversational AI bots** across Web, Android, and WhatsApp by developing backend logic and REST API integrations in Python and Django, enabling reliable client-facing automation for startups and enterprise clients.
- Customized backend workflows and API integrations for Indian financial institutions and enterprise clients across **MENA/Saudi Arabia**, translating business requirements into production-ready Django applications.
- Diagnosed and resolved production issues through systematic debugging and root-cause analysis, implementing **OWASP-aligned** security controls that strengthened application security and improved deployment reliability.
- Containerized backend services with **Docker** and wrote unit tests using **pytest** to validate API functionality before release, supporting more consistent, repeatable deployments.

CognoAI

Python Django Developer Intern · Jaipur, India

- Contributed to **10+ client projects** spanning backend development, API integrations, and deployment workflows, supporting end-to-end delivery within Agile/Scrum teams.
- Assisted in customizing and deploying Conversational AI solutions, collaborating with cross-functional teams to meet client requirements and production timelines.

Valeurbit Infosec

Cyber Security Analyst Intern · Jaipur, India

- Built foundational expertise in **Vulnerability Assessment and Penetration Testing (VAPT)**, identifying and helping mitigate risks such as XSS and SQL Injection in line with OWASP secure development practices.

PROJECTS

- **Task Manager REST API** — Designed and built a production-ready RESTful API demonstrating clean backend architecture, resource modeling, and endpoint design using Python and Django REST Framework.
- **TicTacToe (CLI)** — Developed a command-line TicTacToe game in C, applying core algorithms and data structure fundamentals.
